June 2004 Special Edition

Residential Condominium Policy Replacement Cost Update

Effective with October renewals letters are being sent requesting updated replacement cost value for all RCBAP policies. The building's foundation **must** be included in the determining of the RCV; however the cost of bringing the building in to compliance with local codes (law and ordinances) is not to be included in the RCV calculation.

AccessFlood Enhancements to be implemented on June 21, 2004

Application/Quote is Interactive

Application/Quote screen has been enhanced for your convenience. The screen is now more interactive. Now when entering a new quote/application only those field that are required will appear.

The community number look up has also been enhanced for ease of use. The option to look at the community field information is now accessible via the application as well as from the community drop down option on the main menu bar.

If the property address and mailing address are the same, the mailing address is hidden. Upon indicating the mailing address is different, the field will open for entry.

Renewal Payments are now Available via AccessFlood

Yes! You can pay renewals on-line via AccessFlood. Two options are now available:

- Electronic Funds transfer (ACH)
- Credit Card - Visa, MasterCard, Diner's Club Card and American Express (plus the three or four digit code.)

New User Default Screen:

Did you ever wish you could create your own defaults on the new quote/application screen? Now you can!

The new "User Default Screen" can be found under View/Update. Defaults can be created for the fields you select. Once updated, these defaults will appear on every new quote/application screen.

Please note these defaults can be easily changed directly on the new quote/ application screen.
